## **SOURCE & COVERAGE**

Over a period of last three decades, there has been a tremendous increase in the size of the petrochemical producers family in the country. In early seventies, the first integrated petrochemical complex i.e. IPCL was established at Baroda with the setting up of economic size naphtha cracker and down stream polymer plants of international size. In the decade of 1980-90, a gas based petrochemical complex with a cracker of international size namely MGCC was planned at Nagothane. However, by the end of 2000, more and more complexes were commissioned by the private players in the country. By this time other large and medium units also came in a big way by capacity additions or existing capacity expansions in synthetic fibres, polymers, elastomers, building blocks (aromatics and olefins) etc.

For proper development of this industry, it is very essential to interact frequently with all the major players in this sector. It has, therefore, been felt desirable to prepare the directory of all those companies and undertakings that are engaged in the manufacture of various major petrochemicals, intermediates and petro-based chemicals in the country. This issue is a step in the same direction in which the addresses, telephone numbers, fax numbers, E-mail addresses and websites of registered offices, corporate offices, factory locations and liaison offices at Delhi of various petrochemical producers have been put at one place to facilitate the government, industry and planners to interact with each other more frequently and conveniently.

**The source and coverage of the publication are as under:**

**1. Companies:**

>Cover all major private petrochemical producers (medium and large Scale units) and also public sector undertakings and major refineries. This directory excludes all small scale as well as plastic processing units.

**2. Coverage:**

>The directory covers the addresses/telephone numbers/fax numbers etc. of each company's Registered Office, Corporate Office, Factory Location(s) and Liaison Office at Delhi (if any).

>The directory also covers all those major petrochemical products including intermediates and petro- based chemicals, which are produced by the companies as per the list provided by them.

**3. Source:**

>The addresses / telephone numbers / fax numbers etc. given in the directory are as per the information received from each company.
